

# FORGET ABOUT STANDARD TWO-BLADE SCISSORS:

Cut costs, cords, vendors, risks, and complexity with BITS' 5-blade scissors

We know better than anyone that every financial institution is trying to cut telecommunications-related costs, while still maintaining efficiencies and a high-level of customer service. At BITS, we can help you improve your communications infrastructure and significantly trim costs in five key areas – often resulting in five or six-figure savings over the course of your contract term.

## WHY CUT ONLY ONE COST, WHEN YOU COULD CUT FIVE?

With our 5-blade scissors we can help you shred costs, cut cords, slice vendors, shear risk, and trim complexity without cutting corners on compliance, quality, support, and most importantly customer service.

### 1. SHRED COSTS

Our services are cloud-based and enable you to lower costs related to your phone system, network, and communications infrastructure.

- Reduce upfront hardware costs for routers, switches, and phones
- Extend your internal IT skillsets without hiring certified engineers

### 2. CUT CORDS

With BITS, each of your branches only requires a primary and backup circuit instead of separate circuits for voice, core, internet, and redundancy.

- Eliminate the need for POTS and PRI lines for voice-specific circuits
- Redundancy and automatic failover is built into each branch's service

### 3. SLICE VENDORS

We enable you to consolidate your phone company, consultants, and carrier to create a more reliable service and predictable monthly expense.

- Less finger-pointing when there is a network or phone issue
- Enable your IT team to focus on strategy, not vendor management

### 4. TRIM COMPLEXITY

Our managed and hosted solutions move the complexity of creating and maintaining a best-in-class infrastructure from banks to us.

- Our single-vendor approach means less integration complexity
- Manage your service and security from a single pane of glass

### 5. SHEAR RISK

We will help you lower operational, financial, compliance, turnover, and security risk across all of your locations and branches.

- We've been in business and dedicated to your industry for 14+ years
- Our solutions are built to meet your technical and regulatory requirements

## WHY CHOOSE BITS?

### OUR SERVICES

We offer voice, collaboration, networking, and security solutions designed for financial institutions

### OUR IMPACT

We have 14+ years' experience and service 100+ banks and credit unions, totaling 1000+ locations

### OUR FLEXIBILITY

We understand that every financial institution has unique network and security requirements

### OUR PARTNERSHIPS

We have strategic partnerships with technology leaders like Cisco and SecureWorks

## TAKE THE NEXT STEP BY SCHEDULING A FREE ASSESSMENT

Reach out today to schedule a free Communications Infrastructure Assessment. We'll review your communications environment to identify gaps or areas for improvement, and show you how we can help you improve service levels and cut costs to improve your bank's bottom line.
